3. EVALUATION METHOD AND BASIS FOR AWARD

In order to be considered for an award, the offer must be determined to be technically acceptable. The technical evaluation factors for this procurement are Lowest Price Technically Acceptable (LPTA). Criteria under the LPTA process are judged on a pass-fail basis only. No other rating or qualitative value will be assigned. To be determined technically acceptable, all factors must be acceptable to obtain a pass rating for the technical proposal. Award will be made to the lowest price, technically acceptable, responsible offeror, with satisfactory past performance. The contract resulting from this solicitation will be awarded based on the following:

- A. Right to hold discussions:** The Government intends to award without discussions; however, the Government reserves the right to enter into discussions if determined necessary.
- B. Source Selection Evaluation Process:** The lowest priced quote will be considered as the quote offering the lowest price on the Schedule of Items grand total. The lowest-priced quote will be evaluated and, if the lowest-priced quote is determined to be technically acceptable, no other quote(s) will be evaluated. If the lowest-priced quote is determined to NOT be technically acceptable, the next lowest-priced quote will be evaluated. This process will continue until the lowest-priced, technically acceptable quote is identified.
- C. The Government will award:** A purchase order resulting from this solicitation will be issued to the lowest evaluated price technically acceptable quote. The following factors shall be used to evaluate offers:

The Government may reject any offer that is evaluated to be unrealistic in terms of program commitments, including contract terms and conditions, or unrealistically high or low in cost/price, or are unbalanced, such that the offer is deemed to reflect an inherent lack of competence or failure to comprehend the technical requirements.

Award will be made to the Offeror found to be technically acceptable that offers the lowest total price submitted.

2. Post-Award Evaluation of Contractor Performance

(a) Interim and final evaluations of contractor performance may be prepared on this contract in accordance with FAR 42.1502 and TAM 1242.1502. The final performance evaluations will be prepared at the time of completion of work.

(b) The Contractor can elect to review the evaluation and submit additional information or provide a rebuttal statement. The contractor will be permitted 60 calendar days to respond

from the date of receipt of the evaluation. The contractor's response is voluntary. If the contractor does not respond within 60 days, the Government will presume that the Contractor has no comment. Any disagreement between the parties regarding an evaluation will be referred to an individual at a level above the Contracting Officer, whose decision is final.

(c) Copies of the evaluations, Contractor responses, and review comments, if any, will be retained as part of the contract file, and may be used to support future award decisions.

The Federal Highway Administration utilizes the Contractor Performance Assessment Reporting System (CPARS) to record and maintain past performance information. CPARS hosts a suite of web-enabled applications that are used to document contractor performance information that is required by Federal Regulations. The CPARS module assesses performance on contracts for Systems, Services, Information Technology, and Operations Support; Architect-Engineer contracts; and Construction contracts. Reference material can be accessed in CPARS.

The registration process requires the Contractor to identify an individual that will serve as a primary contact. This individual will be authorized access to the evaluation for review and comment. In addition, the Contractor is encouraged to identify a secondary contact in the event the primary contact is unavailable to process the evaluation within the required 60-day time period. After the FHWA Focal Point registers the contract in CPARS, the contractor representative will receive a system-generated email notifying him/her that the contract is registered. A system-generated email will also provide the Contractor with a User ID if the person does not already have a CPARS User ID.

After a performance evaluation has been prepared and is ready for comment, the Contractor representative will receive a system-generated email notification that the performance evaluation is electronically available for review and comment. The Contractor representative will receive an automated email whenever an assessment is completed and can subsequently retrieve the completed assessment from CPARS.

Contractors may access evaluations in CPARS for review and comment.
